

GEOPROTEX®

PROTEZIONI SPECIALI

INTERNATIONAL PATENT

PRODUCT TESTED BY ENTITY UNIVERSITY OF NUCLEAR ENGINEERING

The natural radiation coming from the subsoil have a major impact on our health so you need to protect yourself to prevent damage to the body that can even be degenerative:
"...The prevention includes the stop to cigarette smoke, the reduction of polluting factors, the Protection from exposure to cancer-causing agents such as viruses and radiation ..."

Prof. Dr. Umberto Veronesi taken from L'Espresso of 27/01/2011

KEY PRODUCT FEATURES:

- This product can protect against electromagnetic fields from artificial and natural radiation from the underground including gamma.
- Product used to get a valid protection from radiation and the consequent elimination of possible accumulations of natural radioactivity type range "gamma" present on the body.
- Product is completely non-toxic and with no contraindications for use.
- Product which has been dedicated part of una Tesi Degree in Medicine at the Faculty of Medicine, University of Siena.

"This is to certify that, some of my patients, after the use of the Geoprotex product, able to protect from environmental pollution caused by natural and artificial electromagnetic radiation, there have been improvements of health with no changes made on the proposed clinical therapy".

Certificazione del 7/11/2007
Dott.ssa Anna Villarini
Istituto Nazionale dei Tumori di Milano

"Based on the medical examinations carried out by me, I have noticed a significant improvement of the clinical symptoms of my patients who use the systems of protection from electromagnetic fields Geoprotex, without having to change their medical treatment in place."

Certificazione del 7/10/2013
Dott. Stefano Limontini
Medico Chirurgo.

"The experimental tests confirm the ability of the tissue to shield the electric and magnetic fields."

Certificazione del 16/5/2003 POLAB
Polo Scientifico Tecnologico
Novacchio (PI).
